## 1 PURPOSE OF THIS DOCUMENT

- Provide the list of verification that shall be minimally performed by FA during the application health check process.

## 2 OBJECTIVES

- To ensure the artefacts provided fulfill the obligation and requirements in place. This includes policy, procedure and standard.
- To reduce the findings in the event of health check conducted by FA.

## 3 SCOPE

- This application health check process covers

(a) Perform health checks through relevant means provided.
(b) Raise incident tickets for issues found and describe actions to be taken.

## 4 TERMS AND DEFINITIONS

| Terms | Definitions |
|---|---|
| | |
| | |
| | |
| | |
| | |

## 5 KEY COMPONENTS OF A SIGN OFF FORM

| Key Components | References |
|---|---|
| Monitoring (Preventive) Sign-off Template | Monitoring (Preventive) |
| | |

## 6 URL

## 8.1 Application In-Scope

| | | | |
|---|---|---|---|
| Name of Maintenance | <Enter system name> | System ID | <Enter system ID> |
| Demand ID | <Enter demand ID > | | |
| System Criticality | ☐ MC (CII) ☐ MC (Non CII) ☐ BC ☐ STD ☐ UNCLASSIFIED | | |
| Internet Facing Apps | ☐ Yes<br>☐ The Application Inventory is updated as internet facing web site or internet mobile apps (in ServiceNow).<br><br>☐ No | | |
| Managed by | ☐ Synapxe Managed ☐ Entity Managed<br><br>☐ The same value is updated in the Application Inventory "Managed by" field (in ServiceNow). | | |
| Frequency of Application Monitoring (Preventive) | ☐ Daily (Weekday)<br><br>☐ Weekly<br><br>☐ Monthly<br><br>For other Frequency, enter here | | |
| Declaration | ☐ I agree that the Monitoring (Preventive) sign-off template may change, and I am using the latest version available in the App Ops Practice and Governance SharePoint for the current KTLO activity. | | |

## 8.2 Capture of Artefacts

### Data Points

| Data Field | Description | Sample Value |
|---|---|---|
| **Section 1: Health Check** | | |
| Means | The method used to monitor the health of system to ensure the software application processes and performs in an expected manner and scope. The methods may consist of application logs, IIS or web server logs, DB logs, system events, application monitoring dashboard or console, eG monitoring and Dynatrace APM. | **Compulsory:**<br>• Application Log<br>• Dynatrace APM – Problems<br>• Interface Logs<br>• Batch Jobs<br>• DB Replication, where DB is managed by vendor<br><br>**Optional:**<br>• DB Alert Log<br>• App Dashboard/Console<br>• eG Monitoring<br>• Dynatrace APM<br>• DB Table & Archive Space<br>• DB Replication, where DB is managed by Synapxe DBA |
| Name / Location | Name of the means that was checked, such as log file name and its file path, name of console or dashboard, etc. | Dynatrace<br><br>log_2022_03_16.log / E:/app_logging/2022_03_06/<br><br>Top web request / Response time |
| Server(s) / Component(s) | Name of server and corresponding component that were checked, such as CPU and RAM utilization, interface queue, DB replication, and etc. | NHGCCDRVPAPP01 / vCPU<br><br>NHGCCOEVPINT20 / Message Queue |
| Any Errors Found in logs Yes / No | Specify if there are any errors in the respective logs | • Yes<br>• No |
| Name & Role & Date of Vendor / FA | Input the name of the Vendor or FA | John Doe (Director of Technology)<br>24th Jan 2025 |
| Health Status | **Good** – Application software performs in an expected manner and scope. | • Good<br>• Fair<br>• Bad<br>• Unknown |
| | **Fair** – Application software performs in an expected manner and scope but with minor issues that do not disrupt user operations | |
| | **Bad** – Application software does not perform in an expected manner and scope and requires immediate system recovery or remedy. | |
| | **Unknown** – Unable to check the health status as the means is not available | |
| Remarks | Any notes to be taken down at artefact level such as observation, steps taken, etc. | Any short paragraph |
| Artefact(s) | Screenshots that provide key information and status of the components that are checked, which include dashboard, charts, server information, error messages, statuses, queue count, are to be attached to support the health check effort. | Any screenshots captured shall have the timestamp.<br><br>If the artefact file is too large to attach, you may provide the |

| | | |
|---|---|---|
| | | URL to the document. Try to only provide key health check information. |
| **Section 3: Issues Found** | | |
| Ticket No (if available) | The ticket no of an incident raised for the issue discovered during the health check. | Any ticketing system or tracker that you are using to track issues and incidents of your application. |
| Summary of Issue | The summarized description of the issue found. | |
| Issue Category | Category of the issue, such as unexpected high load, response time degradation, etc. | |
| Analysis Performed | The analysis of issue is performed to understand the impact, root cause, and problem isolation so as to establish the action plan. | |
| Action Taken / Planned | The actions that **was** or will be taken to address the issues to recover the services. | |

**Any staff found to have deviated from the assigned standard (i.e. misrepresentation of the task through the attachment of non-relevant document, misalignment to the KTLO task requirements) can be reported to MSO Head for further review to verify the facts and context to arrive at a fair assessment on the conduct, skillset, and behavior of the staff. The RO and RO's conduct of being responsible to manage the quality of work performed will also be reviewed.**

☐ **Tick this checkbox to acknowledge the above message.**

**If you did not find the advice from RO/Service Lead sufficient and require further assistance or need advice, please do not hesitate to escalate the matter to your Directors (PDs) or the AGC KTLO Lead. Your prompt communication ensures that we can provide the necessary support and maintain smooth operations.**

## Section 1: Health Check

The **Health Check** is to be performed on regular basis based on the frequency in KTLO Calculator. The activity is to monitor the health of application based on the **Means** stated below. The aim is to identify problems or errors found in the application and analyse them and work out the solution/remediation to fix the problem in order to minimise any impact to the user operations.

The table below is for the support staff to document the information of health monitoring checks performed. Based on the **Means** stated below, enter the details of each check performed. It is important to provide **Health Status** to indicate the outcome of the health check and provide **Artefact** to show the system health information with timestamp. **The health check is to perform only on weekday, excluding public holidays and weekend.**

Application teams should review **only 1 day's worth of logs** regardless of frequency and in accordance with the period stipulated in the KTLO requirements. Kindly refer to the below illustration below for your reference

| Frequency | Logs to review | For illustration Purpose | | |
|---|---|---|---|---|
| | | **Period of Frequency** | **Duration of Logs to be Extracted and Reviewed - only 1 day worth of logs** | **Remark** |
| **Daily** | **On previous working day,** e.g. review on Monday for the logs created on Friday | 19 Sep 2025 | 18 Sep 2025 00:00 - 23:59 | Date selected for log review must fall within the period of frequency |
| **Weekly** | **Any weekday within the week,** i.e. any working day from Monday to Friday (excluding public holidays) | 22 – 26 Sep 2025 | 24 Sep 2025 00:00 - 23:59 | |
| **Monthly** | **Any weekday within the month,** i.e. any working day within first to last day of the month. | 1 - 30 Sep 2025 | 10 Sep 2025 00:00 - 23:59 | |

| Date of Execution | Enter a date |
|---|---|

A. **Essential:** The following health checks need to be performed, which is to ensure that any errors in application logs do not go unnoticed and problems captured covers key areas of application issues.

| SN | Means | Name / Location<br>Input 'N/A' if the Means is not applicable. Note: Any additional Means can be recorded in Section C | Server(s) / Component(s)<br>Input 'N/A' if the 'Means' field is empty. | Any Errors Found in logs (Yes / No) | Escalated to Name & Role & Date of Vendor / Other Synapxe Staff (for issues Infra / Other interfacing App FA)<br>Provide reason(s) if error found but not escalated | Health Status<br>• Good (No Error Found)<br>• Fair (Minor Errors Found)<br>• Bad (Errors Found)<br>• Unknown | Remark<br>Quality rating would reflect accordingly if the status stated (e.g. errors found or health status) **is deviated** from what is found in the artefacts. Provide input in **Remark** if 'Means' field is stated as 'N/A' (Not Applicable) | Artefact(s)<br>Please provide error details in Section D if error is found<br>**Duration of Entries Captured in the Logs for Review**[a,b,c] |
|---|---|---|---|---|---|---|---|---|
| 1 | **Application Logs**[*1]<br>*Identify errors or exceptions for follow-up*<br>Refer to Preventive Monitoring Guide for Application Log diagram in AOPS main page under Monitoring (Preventiv | https://www.synapxe.sg]]<br>Only applicable for application logs not onboarded to Dynatrace. Updates reasons for not using Dynatrace in 'Remark' column | | | Choose an item. | | Choose an item. | Attachment: <<Attach Artefact Here>><br>**Duration of Entries Reviewed**[*a,b]<br>**From**: Eg.01 March 2025 0000<br>**To**: Eg.01 March 2025 2359 |
| 2 | Dynatrace – Problem Aler | https://www.dynatrace.com]][*2] | | | Choose an item. | | Choose an item. | Attachment: <<Attach Artefact Here>> |

| | | | | | | | | |

| 3 | **Interface Logs**<br>*Identify errors or exceptions for follow-up* | | | Choose an item. | | Choose an item. | | Attachment <<Attach Artefact Here>><br>**Duration of Entries Reviewed**[*a,b]<br>**From** Eg.01 March 2025 0000<br>**To** Eg.01 March 2025 2359 |
| 4 | **DB Replication, where DB is managed by vendor**[*3]<br>*Confirm DB replication process is successfully completed* | | | Choose an item. | | Choose an item. | | Attachment <<Attach Artefact Here>><br>**Duration of Entries Reviewed**[*a,b]<br>**From** Eg.01 March 2025 0000<br>**To** Eg.01 March 2025 2359 |

[*1] For applications that do not have application log, please provide any equivalent means that serves similar purpose where information of application errors can be found.

[*2] For applications that do not have Dynatrace installed, please provide other means that meets similar purpose where performance anomalies in your applications, services, and infrastructure such as such as performance degradations, improper functionality, or lack of availability, can be detected.

[*3] DAM alert monitoring is NOT part of Application Monitoring (Preventive) activities.

[*a,b,c] Additional fields are added due to Audit Findings across multiple apps. Application team to ensure you are clear of the meaning of the fields and update appropriately.
